SUMMARY

Backend Developer with nearly 2 years of hands-on experience building and maintaining backend services using ASP.NET Core and Entity Framework Core.

Experienced in RESTful API design, relational databases, and clean code principles, with a strong focus on improving backend reliability and performance.

Actively expanding practical knowledge in DevOps practices such as containerization, CI/CD, and cloud-based deployment within real-world environments.

TECHNICAL SKILLS

- **Languages:** C#, SQL, TypeScript, JavaScript
- **Backend:** ASP.NET Core Web API, Minimal API, Entity Framework Core
- **Databases:** PostgreSQL, SQL Server, Elasticsearch
- **Architecture:** 3-Layered Architecture, CQRS (basic), Pub/Sub
- **Cloud & DevOps:** Docker, Kubernetes, Nginx, Google Cloud Platform
- **Tools:** Git, GitHub
- **Frontend** (collaboration): Angular, React

WORK EXPERIENCE

CT&P Solutions JSC (Vietnam) | Backend Developer

08/2023 - present

WebOrder (WO) | Nov 2025 - present

Team size: 8 members

Description: A B2B web application for managing orders, stock, deliveries, promotions and rebates for tire distribution and import operations

Technologies:

- Backend: .NET 9, Minimal API, Aspire, CQRS, 3-Layered Architecture
- Frontend: TypeScript, React 18, NextJS, Tailwind
- Database: SQL Server 2019
- Deployment: Docker, Nginx, K8s
- Source controls: Git, GitHub

Responsibilities:

- Designed and developed CRUD and publishing APIs for system notifications, including promotions, rebates, and internal announcements
- Implemented flexible audience-targeting logic to distribute notifications to multiple recipient groups, such as roles, specific users, and business-defined groups

- Worked with existing database views for incoming and available stock and implemented a new view to retrieve related material data via key-based relationships
- Implemented a column matrix mechanism to dynamically control column visibility based on user roles

Order Operation Management System (OOMS) | Jul 2024 - Nov 2025

Team size: 4 members

Description: A comprehensive web application managing orders, permits, production workflows, and deliveries for outdoor structures as part of a distributed microservices ecosystem

Technologies:

- **Back-end:** .NET 8, ASP.NET Core WebAPI, EF Core, 3-Layered Architecture, Event Driven (Pub/Sub)
- **Front-end:** HTML, SCSS, TypeScript, Angular 18, Kendo UI
- **Database:** PostgreSQL, Elasticsearch
- **Deployment:** Docker, K8s, Nginx, Google Cloud Platform (GCP)
- **Source controls:** Git & GitHub

Responsibilities:

- Designed and implemented REST API endpoints to validate CRM reference order updates, ensuring data integrity across the order management system
- Implemented customer email update logic to prevent duplicate records and synchronize customer information across ERP, OOMS, and Customer Portal services
- Designed and implemented an API endpoint to clear inactive ERP sessions, maintaining synchronization between ERP and OOMS
- Implemented a daily scheduled job using Google Cloud Scheduler to automatically clear inactive ERP sessions, reducing manual operational overhead
- Refactored delivery plan logging from database triggers to application-level logic to accurately track the source screen responsible for modifications
- Integrated Dropbox text tags for electronic document signing using embedded DevExpress components, improving document workflow efficiency

SISOSIT Power BI Dashboard | Jan 2024 - Jul 2024

- Enhanced an existing Power BI dashboard to scale from single-division to multi-division usage
- Updated measures for sell-in, sell-out, and stock-in-trade metrics
- Applied parameter tables to dynamically adjust measure labels based on filters

Internship | Aug 2023 - Dec 2023

- Learned backend development with ASP.NET Core and Angular
- Built foundational REST APIs and worked with relational databases
- Participated in daily stand-ups and team development activities

EDUCATION

Bachelor of Engineering in Information Systems

University of Information Technology, VNU-HCM

Aug 2019 – May 2024 | **GPA:** 3.2 / 4.0

CERTIFICATE

TOEIC Listening & Reading (Nov 2022)

Score: 670 (**Listening:** 315 | **Reading:** 355)
